

Hi,

Branding your copy of Zip2profit is very easy!

Open the branding software and enter the desired information into each field.

There are 3 things you can change.

1 The Main Ad copy. This is the text in blue in the picture above. What you type here is what the user of the program will be able to read.

2. The affiliate url. Here you can enter an url (do not use http://), ex. www.mydomain.com and when your customer clicks the blue text a browser window will be opened and they will be taken to this url! Use it to showcase your website or why not for affiliate products!

3. The font size for the main ad. If you use a shorter text, change the font size to make the text bigger! You will have to test until you get the desired size. Note! If you make the font size to big the text will get lost at the end. So after each font size change, read the text to make sure it is completely visible.

Good luck with your marketing!

Kenth "The Designer" Nasstrom
