

IMPORTANT: Read this entire report like your life depended on it!

This Report was created as a **FREE** resource to help you understand How to Really Make Money On The Internet and may be used as **FREE** content on your Web site. Recommend It Freely!

"Find Out What Brings Me Both Fame & Money On The Net!"

Comments: For reasons you will find obvious a bit later, this report has motivated and pivoted 100's of newbies and internet veterans alike to get started with their own real online businesses and make their financial dreams really come true! It *will* help you too...

For a very long time, I'd believed that working for others on the internet (selling affiliate programs) was the *only* way to go. The only way to my financial freedom.

Later, I learned *the hard way* that I was wrong...

I'd left offline marketing to fulfill a dream. Offline it's often said that "**Working a job is just not the way to get rich or attain financial freedom**", and that has been proven to be an absolute truth told.

So, you might ask then... "**How about online marketing? What makes working for other people offline different from working for other people online?**"

To me, the two are very much the same.

In this report, I aim to dispel so many of the lies and other half-truths you're being fed *daily* about marketing on the internet.

Now, if you'll remember clearly, the first day you actually got online with the interest to make your living from home, you probably saw a headline very similar to this... "**Make \$100,000 a year from your desktop!**" or "**\$4,000 dollars per month, Real PC Work! All you need is an email account and your PC!!!!**" and the rest of those **HYPED** up headlines.

Then a couple of weeks later, they tell you this - "**You can't sell anything from your web site unless you've built a strong foundation online and have customers with glowing testimonials to prove that you're real and can deliver what's been promised...**"

The latter statement is actually **both true and false** simultaneously.

Your Solution To ZERO Testimonials & Endorsements...

When I first started out with online marketing some years ago, I also got sucked in with those bogus claims that if I was not someone who was *already famous* and who already had 100's of testimonials from already happy & satisfied customers, I would never make it in the online world selling products of my own.

So the solution to that pressing problem of **NO** testimonials and no glowing records from the 90's for me was to keep working *affiliate programs* with all the life I had in me, until *some day* when I would be able to start building my own business *with a strong reputation as a trustworthy marketer*.

Boy was I ever **WRONG!**

You see those two headlines **about making \$100,000 or \$4,000 from your desktop doing little work** and similar ones are **Hype**, I know, but is it also true that some people really do make that much money at all online?...The answer is Yes, a lot of people actually do.

Unfortunately though, an even higher percentage of net marketers *never* do make that much money from their online businesses, and they *never will*, simply because to make that kind of money constantly on the internet, these people have got to have their priorities set straight. And they have to be ready to push past all of the hype (that makes everything sound so easy) and be ready to put in some of that good old elbow grease to make things work well for them on the internet.

I'm *not* promising that after you read this report you will immediately start making millions as a result. I can't do that since I don't know what your capabilities are or what your personal situation, at the present moment is.

SO WHAT DO I PROMISE YOU?...

I know that if you've never been confident enough about creating your own ebooks for sale, then this report will show you how and why you must start to turn out your own products and services and stop using all the creativity you possess **only** to make affiliate program owners millionaires, while *you* work & slave to earn a couple of fast checks every now and then.

Working **only** affiliate programs is good only for those who lack the time, the creativity, the ability, the courage or the push needed to build their own products and services so make any kind of living from marketing on the internet, they have to rely on the ready-made products of others around them, and make their money that way.

YOUR SOLUTION...

If you're someone who's looking to show people *exactly* what *you* can do for them, then you *should be* creating and selling *your own* products and services online.

Personally **I'd** known this truth for sometime, but somehow could just never get started. I was scared stiff that when I do create a product or start a service I would be laughed right back to the drawing board (because I didn't already possess glowing awards or HOT testimonials from past customers).

SOMETHING THAT BECAME EVEN MORE OBVIOUS VERY VERY LATE...

It occurred to me a bit late. But it **did** occur to me that you can't ever boast of having helped 100's of small businesses or get real life testimonials from people, if you **never** do own your own products and services in the first place!

If you **never** create your own information products that sell **your** expertise, creativity, experience or the results of intensive studies and researches you may have carried out prior to writing your information product(s).

If you never build up the guts to put aside (for at least a few weeks), those weak commissions from so many of the affiliate programs out there on the internet, and build *your own first sellable product*, you probably will *never* get those glowing records or great testimonials that can make you a rich person!

So, **coming back to my experiences**, I'll reveal some things to you now, that should move you to act sooner than you can blink! I wish **I** had had someone to tell me all this a long long time ago...

SO WHAT'S THE SECRET?

About a year ago, I put aside *a brand new marketing system* I had worked on for well over *6 weeks* that I was planning to use to promote someone else's products. And then I immediately got the urge to do something better, something that would *really* help people and get them to talk about *me* and mention *my name* when they needed internet marketing assistance or advice.

You see, I am a born entrepreneur. I love the idea of sitting at home and making tons of cash that I can spend any way that I choose, at any time that I choose, and without having to worry about answering to any pain-in-the-behind Boss or anything else like that.

I'm someone that never had to read 100's of pages of articles or reports that would *convince* me that internet marketing was lucrative, legal and would work. I understood the *power* of the internet for making money from home right from the first time I got wind of it.

So one great day, *it just struck me that I must get started on building my own business*, my own sellable products and services and eventually start **my own affiliate programs** that people would work to make *me* rich on the internet! Heck, marketing online is just like in the offline world (with only a few exceptions), and if you know what the heck you're doing, it can be extremely lucrative too!

LISTEN, YOU MUST START FROM SOMEWHERE...

Where better to start from than your own first *sellable* product? **I** started marketing my first marketing ebook *without any glowing records as an online marketer and even without any testimonials from hundreds of happy customers*, and today...

Well I'm long past that stage now, and have my name being written along side some of the legendary net marketers of our time! (something I'd thought was never going to happen in a million years!)

If I hadn't damned all the consequences and started doing something last year, I would have remained a *nobody* working affiliate programs with 1,000's of other *no faced marketers* that didn't have the guts to do what I did! As it turns out, it took only my strong will and less than 1 month to make my own financial dreams take shape and create the strong foundation that had been over-played by past experts in online marketing! And if I could do it, heck! what on earth are *you* waiting for?

Despite all the discouraging and lukewarm remarks I received at the time of writing my own first sellable ebook for the first time almost 12 long months ago, I still chose to start from there.

One truth I'll quickly reveal to you at this point is this...

If you can write information in the form of free ebooks and free articles, and give this information out for free to **promote** affiliate programs, then *you can write information products that you can sell*, to make **yourself** more money *faster* and *build a firmer, stronger foundation for yourself and future enterprise online!*

AT THE START, IT'S NEVER EASY, BUT...

Now, I'll tell you another truth that Internet marketers and many *gurus* fail to tell you - And that truth is this - It's not easy. (Nothing good in life ever is, though I wish there was at least one thing...😊) But the fact is Internet Marketing can be a lot of hard work, especially when you're just starting out.

It takes work.

Every single millionaire and successful business owner on the face of this earth worth his "weight in gold" will affirm to this and also tell you that they never got there in one night.

But they will also tell you 2 things (**if you ask them**). They'll tell you...

1. That they never got where they are today, *working for someone else*

And...

2. They got where they are today starting from their **FIRST** attempts building every successful business they ever had *from the ground up* - That means they started out just like you are today!

You possibly still hold doubts, I can understand that. I did too! But...

Even if you're not sure of yourself, I want you to try. *Just try it*, Start doing something, anything, it doesn't matter what it is. It's *after* you start that you'll *see* those mistakes which you can then correct and move on to bigger and better things!

A PROMISE AFFIRMED...

The one thing I do promise you is this - By the time you finish reading this report, you will be able to look at the Internet through different, **clearer eyes and see all the profits you've been missing making someone else rich by sticking solely to free affiliate programs** and working them with all the life, energy and creativity in you.

*"You can succeed if others do not believe in you.
But you cannot succeed if you do not believe in yourself."*

Dr. Sidney Newton Bremer Of Successful Achievement

That's the truth of it. **That's the one quote that brought me both fame and money on the internet, and I continue to follow that rule because everything I do for my business depends completely on it!**

Every successful person started first by believing in himself (even if people around them didn't give encouragement or approve of their methods or what they were actually doing).

The First Step for every successful individual in this business was deciding they were ready to make a difference and then putting together everything they could muster and just making a go for it! You see actually becoming successful at what they'd set out to do was just the NEXT step for these people. Then afterwards, they could move on to even bigger and better things!

Make it happen for you. **Take The First Step** - Believe sincerely that you can do this. That **you can build your own business around your own products or services** that the public needs, wants & will pay money for, then go out there, and just do it!

I wish you all the very best!
